

*25th Annual*

# PERFORMANCE PLUS BULL SALE

PRESIDENT'S DAY • FEBRUARY 19, 2024 • 1:00PM • TERREBONNE, OR

176 TOTAL BULLS • 171 ANGUS BULLS • 5 SIM-ANGUS BULLS

# SALE INFORMATION

**SALE ORDER & SUPPLEMENT:** a supplemental sheet will be available sale day. This sheet and any announcements from the block will take precedence over the sale book.

**VIDEOS:** videos of each lot will be available on our website [www.teixeiracattleco.com](http://www.teixeiracattleco.com) and our YouTube channel.

**TERMS & CONDITIONS:** the terms are cash. All cattle will sell under the Terms and Conditions as recommended by the American Angus Association. All announcements at the sale made from the auction block will take precedence over statements made in the sale book. We reserve the right to withdraw any sale lot not meeting our sale specifications at sale time.

**LIABILITY:** all persons attending the sale do so at their own risk. Neither Teixeira Cattle Co., nor its staff, accept liability.

**INSURANCE:** Please let us know at check out.

**BULL HEALTH GUARANTEE:** all bulls selling are test-negative for BVD type 1 and 2. It is estimated that 1-5% of bulls being sold across the country are Persistent Infected (PI) for BVD carriers; at Teixeira Cattle Co. this percentage is ZERO. PI BVD cattle will cause first trimester abortion and create respiratory challenges in stressed calves. PI infected cattle are often difficult to pinpoint and have significant dollar impact. Consistent with our commitment to biosecurity and herd health, all bulls are sold Trich free.

**BULL DEVELOPMENT GOALS:** these bulls are developed to cover rugged terrain and provide multiple years of good service. We are not interested in supplying fat, overfed, soft footed bulls that melt away in one breeding season.

**HERD HEALTH:** all cattle will be accompanied with proper health certificates for immediate shipment to most locations in the United States. If cattle are selling to areas requiring testing, tests will be completed before shipment can be made. Only virgin bulls sell. Any trich test requested for out-of-state shipment will be paid by the seller.

**ABSENTEE BUYER SUPPORT (ABS):** if you are unable to attend Performance Plus, our staff will purchase bulls meeting your personal specifications and will guarantee to do this within your budgeted price. Buyers in the ABS program must be fully satisfied with their bulls upon delivery. INSURANCE mortality insurance on your purchase can be obtained from James F. Bessler, Inc. at time of settlement.

**IDENTIFICATION OF CATTLE:** ear tags on all sale cattle will correspond to lot numbers in the sale book.

**CUSTOMER APPRECIATION:** if you purchased a bull in our 2023 Sale By The Sea or our 2023 Performance Plus Bull Sale, you will receive a 5% discount on all your purchases in the 2024 Performance Plus Bull Sale - our way of saying thanks to past buyers!

**WINTERING PROGRAM:** Teixeira Cattle Co. is happy to hold your bulls from sale day until April 1, 2024 free of charge if a minimum of \$5,000 is spent at Performance Plus 2024. After April 1st, a fee of \$5.00 per day for feed will incur. You are more than welcome to winter your bulls with Teixeira Cattle Co. if you spend less than \$5,000, however, there will be a fee of \$5.00 per day for feed.

**DELIVERY:** free delivery within California and Oregon as well as central points in Washington, Idaho, and Nevada. Delivery will be arranged for all other locations as cost effectively as possible. A **\$75.00** discount will be given for each lot loaded and removed from sale location on sale day! Mortality insurance is advised.

**SEMEN TEST:** all bulls have been semen tested prior to the sale by Hoffman AI Breeders. All bulls guaranteed.

**BREEDING GUARANTEE:** bulls are guaranteed to be sound breeders for the first breeding season, which is defined as 70 days after turnout. This guarantee does not cover death loss. All issues must be presented to John Teixeira by September 1, 2024.

**INSPECTION OF CATTLE:** sale cattle will be available for inspection at any time. Please call John at (805) 448-3859 if you would like to view the offering prior to the sale. See a video of the sale offering at [www.teixeiracattleco.com](http://www.teixeiracattleco.com).

**BULL FEET:** unfortunately we were unable to photograph the bulls feet due to weather and time, however, we keep with our policy of never trimming our bulls' feet.

**RETAINED SEMEN INTEREST:** Teixeira Cattle Co. retains a 50% semen interest. Buyer retains 100% possession and 100% salvage value.

**COMPLETE PERFORMANCE DATA:** available sale day or at your request, including ultrasound data and Igenity Beef DNA.

**ANGUS MEDIA** EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at [www.angus.org](http://www.angus.org) and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLink<sup>SM</sup>, CAB®, Pathfinder®.

## VIEW ONLINE

Watch the sale in real time & bid online at [www.CCI.live](http://www.CCI.live)

- **As a buyer**, you do not need an account or to login to watch the sale but you must have a validated account to bid.

- After you are logged in, you must proceed to the sale page for any and every auction and click "**Get Buyer Number.**" Some auctions require a pass-code to obtain a buyer number even after you are approved by CCI.live. Pass codes generally come from the sale manager or ranch for that particular sale.

- CCI.live will operate with ease on a **cellular device, laptop, desktop or tablet.**

- A **modern or current browser** is important and will make your experience better. You do not need to install the app on cellular devices to watch a sale. CCI.live is a browser-based application meaning it will play on most new browsers, but you can also download the CCI.live app at the Apple App Store or through Google Play.

- **For successful bidding you must have good Internet service!** It is very important to be stationary. If you are driving and bidding, expect to have some service issues. If you are stationary on a good device, with healthy Internet, expect a very successful bidding environment. If you have slow Internet watch the "asking price" on the screen - it is real time and refresh your browser if you feel like you have some lag.

- **Support line open during all sales. 405-400-9505** - Please contact the ranches for invoices and trucking.

## Welcome

We are excited to bring you the 25th Performance Plus Bull Sale... can you believe it?! At Teixeira Cattle Co., our goal is to produce quality bulls – bulls that will contribute to the legacy of your herd and your family. We want to always be improving, learning about what challenges are facing us in this industry, trying to stay a step ahead and not get tunnel vision. What is extremely important to us is wanting what's best for our customers and their herds.

Our family has been rooted in the agriculture industry for more than six generations. As most of you know we are a family owned and run, cattle & hay ranch. We are blessed and THANKFUL to be in a partnership with our dad and mom (Allan & Cee). Our boys, Nathan, still in the Army, Joseph, a senior in high school, who is enjoying some extra cattle shows this year and Ben, a freshman, who still eats, sleeps, and breathes hockey, roller or ice, he doesn't care! The boys have really come together and pushed through with us to make this continue, always helping when asked and even when not asked! We got to enjoy some family time together at Arizona National, where they all worked together getting the steers ready. We enjoy watching them support each other.

It is not always easy or fun, working through ice and mud has definitely had its challenges, but we have chosen this, and it's God's grace and a little grit that keeps us pushing. (A little sleep would be nice, too!) Allan, John & Tom were on the road making bull visits, if we missed you we are sorry, we would love to swing into your operation and see how our bulls are working for you, we sometimes run out of time and fuel, hahaha, don't ask!

Many of you ask how John's doing since he broke his femur, thank you for asking, the bone is strong, he's just working on building up muscles...now, Mom is moving a little slower, she sadly broke her hip right before our September sale, BUT she has healed quickly, God is GOOD!

We are fortunate to have help from Ricardo, Nicolas and Lorenzo, they are right there with us through the day to day, feeding, strawing, getting bulls ready for sale day, it's a continuous cycle. Thank you just doesn't seem enough sometimes.

This year you will notice a physical change to our sale barn. The day after our sale last we lost power, I won't get into the details, but let's just say the barn had electrical issues from before us, BUT it's all fixed now! We hope you like the new look and warm feel, emphasis on warm, insulation works wonders!

We will have our traditional Sunday night dinner and guest speakers, please let me know if you'll be there for dinner.

If you have any questions, please don't hesitate to reach out, we are here to help in any way we can. You are welcome to come view the bulls anytime!

*- The Teixeira Family and Tom Hill*

# TEIXEIRA CATTLE CO PRESENTS

## PRE-SALE DINNER AND DISCUSSION

Sunday, Feb. 18th • 3867 NW Lower Bridge Way, Terrebonne, Oregon

Please RSVP through the QR code below or call Heather at 805-448-3869

Teixeira Cattle Co Presents Our family would like to invite you for a family dinner and panel discussion. We would love for you to join us! Please RSVP using the QR code below if you plan to attend – it makes food preparation easier. There will be door prizes for those in attendance! If you cannot join us in person, we will also live stream the discussions through our Facebook page.

### FAMILY DINNER & PRESENTATIONS SUNDAY - 4:00 P.M. - FAMILIES WELCOME

**KARA LEE**  
Director, Producer  
Engagement  
for the Certified  
Angus Beef®  
brand

#### **KARA LEE** *The Continued Pursuit of Quality*

*With more high quality genetics readily available to commercial cattlemen than ever before, does an intentional focus on quality still matter? Hear about the current state of the industry as it relates to quality beef production and demand trends. Take a look at some of ways commercial producers focusing on quality can continue to capture value for their investment without sacrificing balanced-trait selection.*

**ROB GILL**

#### **ROB GILL** *Introducing Pendelton Beef*

*Introducing Pendelton Beefducers focusing on quality can continue to capture value for their investment without sacrificing balanced-trait selection.*

to RSVP for our  
Pre-Sale Dinner and  
Discussion

# TOM HILL'S VIEW POINTS

## TCC Genetic Summary VS. Average Angus Non-Parent Bull

### The Program

- Improve Calving by increasing Calving Ease Direct (CED) and moderating Birth Weight.
- Add Growth without sacrificing maternal, while increasing Carcass Value, \$Grid, \$Beef and Improving Maternal Traits such as Heifer Pregnancy, Calving Maternal and \$Maternal.
- \$Index Values: Above industry Averages for both terminal and maternal traits allow for optimum efficiency + value.

### Industry Trends

- Cow fertility is considered to be decreasing across the commercial sector as reported by veterinarians and commercial managers....? WHY? Speculation would suggest the demand for Terminal traits, growth and \$B put cow fertility at Risk.
- Recent University data has documented that fat bulls have lower serving capacity and create a higher level of embryonic death loss.
- Marbling continues to be a driver for value added cattle across all sectors of the beef marketing chain.

Trait	Angus Avg.	TCC Avg.	TCC +/-
CED	7	8.5	1.5
BW	1.2	0.25	-0.95
WW	64	69	5
YW	112	121	9
PAP	1.2	0.75	-0.45
HP	12.2	13.7	1.5
CEM	9	11.2	2.2
Milk	27	29	2
MARB	0.66	0.94	0.28
REA	0.65	0.76	0.11
\$M	64	74	10
\$G	51	69	14
\$B	143	164	21
\$C	249	286	37

# SUCCESS THROUGH INNOVATION

WHY BUY BULLS FROM TEIXEIRA CATTLE CO?  
WE BELIEVE TRANSPARENCY, INNOVATION  
AND A PROGRESSIVE MINDSET ARE THE KEYS TO SUCCESS.

- All our bulls have an 840 EID tag.
- All our bulls have been Angus GS tested and Igenity Beef tested, over 75K markers.
- All our bulls have their permanent freeze brand individual ID beginning number representing the birth year.
- All our bulls have been ultrasounded by Southeast Idaho Ultrasound.
- All our bulls are BVD tested.
- Semen evaluations by Hoffman AI Breeders available sale day, your bull's copy goes home with you!
- We stand behind our bulls, they are guaranteed.
- Always here for our customers, we want to know how our bulls work for you!
- We believe in being original, firmly established, rooted, embedded.
- 95% of the sale offering qualify for CAB standards.

The CAB® icon will appear on the pedigree of those bulls that meet the criteria for targeting the Certified Angus Beef® Brand.

# EPDS EXPLAINED

American Angus Association

## PRODUCTION

CALVING EASE DIRECT (CED) is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

BIRTH WEIGHT (BW) expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

WEANING WEIGHT EPD (WW) expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

YEARLING WEIGHT EPD (YW) expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

RESIDUAL AVERAGE DAILY GAIN (RADG) expressed in pounds per day, is a predictor of a sire's genetic ability for postweaning gain in future progeny compared to that of other sires, given a constant amount of feed consumed.

DRY MATTER INTAKE (DMI) expressed in pounds per day, is a predictor of difference transmitting ability for feed intake during the postweaning phase, compared to that of other sires.

SCROTAL CIRCUMFERENCE EPD (SC) expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

## MANAGEMENT

DOCILITY (DOC) is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

PULMONARY ARTERIAL PRESSURE EPD (PAP) is expressed in millimeters of Mercury (mmHg), with a lower EPD being more favorable indicating a sire should produce progeny with a lower PAP score. PAP score is an indicator of susceptibility to high altitude disease commonly experienced at elevations greater than 5,500 feet.

## MATERNAL

HEIFER PREGNANCY (HP) is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

CALVING EASE MATERNAL (CEM) is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

MATERNAL MILK EPD (MILK) is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

## CARCASS

CARCASS WEIGHT EPD (CW) expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

MARBLING EPD (MARB) expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

RIBEYE AREA EPD (RE) expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

FAT THICKNESS EPD (FAT) expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

\*EPD definitions taken from [angus.org](http://angus.org)

**\$VALUES** Dollar value indexes, or \$values, or a tool used to select for several traits at once based on a specific breeding objective. An economic index approach takes into account genetic and economic values as well as the relationships between traits to select for profit.

**MATERNAL WEANED CALF VALUE (\$M)** an index, expressed in dollars per head, predicts profitability differences from conception to weaning with the underlying breeding objective assuming that individuals retain their own replacement females within herd and sell the rest of the cull female and all male progeny as feeder calves. The model assumes commercial producers will replace 25% of their breeding females in the first generation and 20% of their breeding females in each subsequent generation. Traits included are as follows: calving ease direct, calving ease maternal, weaning weight, milk, heifer pregnancy, docility, mature cow weight, claw set and foot angle.

**GRID VALUE (\$G)** an index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for carcass grid merit compared to progeny of other sires. The underlying objective assumes producers will market cattle on an above industry-average carcass grid. Traits included in the index are as follows (in no particular order): carcass weight, marbling, ribeye area, and fat.

**BEEF VALUE (\$B)** a terminal index, expressed in dollars per carcass, to predict profitability differences in progeny due to genetics for postweaning and carcass traits. This terminal index assumes commercial producers wean all male and female progeny, retain ownership of these animals through the feedlot phase and market these animals on a carcass grid. Traits included in the index are as follows: yearling weight, dry-matter intake, marbling, carcass weight, ribeye area and fat.

**COMBINED VALUE (\$C)** an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd.

- Out of a maternal sister to TEX Teton 9052. This bull has a major pedigree punch in the bottom side. He mixes GAR Progress 830 who is a donor for Spruce Mountain, 2513 is a former donor cow at 44 Farms, and the now-deceased TEX Empress 7004 who was a donor cow for Express Ranches and Teixeira Cattle Co. On the top side, he has TEX Able 8528, Hoover Know How, and Hoover No Doubt - all mixed into a high marbling and powerful individual.
- Ranks in the top 1% for MARB, \$G, \$B, \$C, \$AXH and \$AXJ; top 2% for Angle; top 10% for CEM and \$F; top 15% for RE; top 20% for SC and \$W; top 25% for RADG, MILK, PAP, CW and \$M.

## **EXPECTED PROGENY DIFFERENCES (EPD):**

are the most accurate and effective tool available for comparing genetic levels. In using EPDs, the difference between two sires' EPDs represents the unit difference expected in the performance of their progeny. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org). Listed below are the units ASA EPDs are expressed in:

**ALL-PURPOSE INDEX (API):** Dollars per cow exposed under an all-purpose-sire scenario. (See below for more details.)

**BACK FAT (BF):** Inches of backfat.

**BIRTH WEIGHT (BW):** Pounds of birth weight.

**CALVING EASE (CE):** Percent of unassisted births when used on heifers.

**CARCASS WEIGHT (CW):** Pounds of carcass weight.

**MATERNAL CALVING EASE (MCE):** Percent of unassisted births in first-calving daughters.

**MILK (MLK):** Pounds of weaning weight due to milk.

**MARBLING (MRB):** Marbling score.

**MATERNAL WEANING WEIGHT (MWW):** Pounds of weaning weight due to milk and growth.

**RIBEYE AREA (REA):** Square inches of ribeye.

**STAYABILITY (STAY):** Percent of daughters remaining in the cowherd at 6 years of age.

**TERMINAL INDEX (TI):** Dollars per cow exposed under a terminal-sire scenario.

**WEANING WEIGHT (WW):** Pounds of weaning weight.

**YEARLING WEIGHT (YW):** Pounds of yearling weight.

**YIELD GRADE (YG):** Yield grade score.

**\$ INDEXES:** Though EPDs allow for the comparison of genetic levels for many economically important traits, they only provide a piece of the economic puzzle. That's where \$ indexes come in. Through well-conceived, rigorous mathematical computation, \$ indexes blend EPDs and economics to estimate an animal's overall impact on your bottom line. The same technology that led to the dramatic progress in swine, poultry and dairy genetics over the last several decades was used to develop the following \$ indexes:

**ALL-PURPOSE INDEX (API):** Evaluates sires for use on the entire cow herd (bred to both Angus first-calf heifers and mature cows) with the portion of their daughters required to maintain herd size retained and the remaining heifers and steers put on feed and sold grade and yield.

**TERMINAL INDEX (TI):** Evaluates sire for use on mature Angus cows with all offspring put on feed and sold grade and yield.

**USING API AND TI:** First, determine which index to use; if you're keeping replacements use API, if not, TI. Then, just as with EPDs, zero in on the unit difference between bulls. (As described above, index units are in dollars per cow exposed.) The difference can be used to determine how much a bull is worth compared to another. For percentile rankings or more detailed information about EPDs and \$ indexes visit [www.simmental.org](http://www.simmental.org).

## Igenity® Beef

# The Right Decision Every Time. Selection Choices Backed by Data for Herd Advancement.

You've used the best bulls each year on your cows; now how do you make the best replacement heifer selection decisions? Igenity® Beef is the tool to ensure the heifers you select each year to retain fit the goals of your operation and will increase genetic progress year after year. Igenity Beef gives you 17 traits on each individual animal, you can easily sort those animals based on your operation's criteria and find bulls to mate those heifers that will further your herd for the next generation.

### Benefits

**Complete:** Get clear, actionable scoring on 17 maternal, performance, and carcass traits.

**Simplified:** Production, maternal, and terminal selection index options help with multi-trait selection.

**Organized:** Encompass platform assists in visualizing data and sorting cattle.

**SeekSire™:** Verify calves' sires to help identify the best genetics and sires covering cows.

**En vigor:** Select heifers that benefit the most from a crossbreeding program.

### Traits

**Maternal:** Birth weight, calving ease direct, calving ease maternal, stayability, heifer pregnancy, docility, milk, and scrotal circumference.

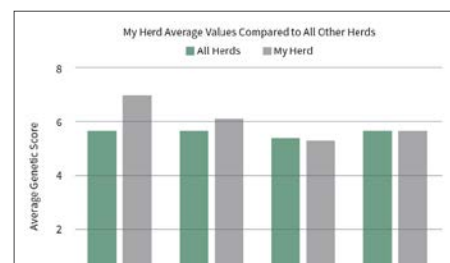

**Performance:** Residual feed intake, average daily gain, weaning weight, yearling weight.

**Carcass:** Tenderness, marbling, ribeye area, fat thickness, hot carcass weight.

### Encompass

Your herd has been genomically tested, now what do you do with the data? The Neogen® Encompass platform provides you the ability to sort your own herds genomic data quickly and easily.

Custom indexes, herd benchmarking, and effective sorting from Encompass is pictured below.

Contact Neogen for more information at [genomicsinfo@neogen.com](mailto:genomicsinfo@neogen.com) or at 877.443.6489.

“We at Neogen are very excited about the latest update to Igenity Beef. The predictions have been enhanced for 15 traits, allowing for updated comparisons to industry average performance. We also added Scrotal Circumference as a new trait to be delivered and put significant resources into updating the prediction for Residual Feed Intake (RFI). This continued innovation is our commitment to ensure commercial cattlemen get the most out of their investment. ”
